Dear eLearning Mind,

When I came across eLearning Mind's job post on LinkedIn, I immediately felt the urgent need to apply for the UI/UX Designer role in San Diego. Having to be an Apprentice UI/UX Designer role at my previous educational and professional program at Bloc for the past year, and after reading the detailed description of the role, I'd like to take this opportunity to express my interest for this particular role at eLearning Mind.

For the past year I studied and worked along with my mentor at Bloc's Immersive Design program, learning all the foundational aspects of what UI/UX Designer must have, and created three projects (Ponocrave, Walden, & Blocbox) covering all roles (UI/UX). I can confidently assure you that I will bring a demonstrated ability to accurately design and layout content for both print and digital, as well my visual design skills (eye for color and composition) when creating digital products. Duties such as rough and polished (hi-fidelity) prototypes are skills and experiences I can bring without a doubt. The role states either remote or in-house, but I'd just like to inform you that I am highly motivated and goal-oriented when I'm working along side-by-side with other optimistic team members when creating user-centric products, and I genuinely feel eLearning Mind is perfect place where I can positively contribute in creating amazing products and hone my skill to become a better designer.

I truly believe the UI/UX Designer is the role I genuinely fit in most, and it would be a privilege to work along with other creative, user-centered designers. I appreciate for your time and consideration. I look forward to the opportunity to speak with you further.

Mahalo,
Robert Hiro Kameda
